Presented in partnership with Business Development Bank of Canada, Emerge Knowledge Design Inc. and Deloitte Touche

Manitoba Network (QNET)
454-167 Lombard Avenue
Winnipeg MB R3B 0T6
Ph: (204) 949-4999
Fax: (204) 949-4990
Email: mail@qnet.mb.ca
Web: www.qnet.mb.ca

ISO 14000 is the solution for businesses that want to help protect the environment by implementing a dedicated environment management system. ISO 14001 is a series of international standards companies use to integrate various environmental protection aspects into their procedures. ISO 14001 enables a company to develop an environmental policy, determine the impact of their products or services on the environment, define quantifiable environmental objectives, and implement programs to achieve these objectives involving an audit, corrective actions and a review of its management procedures.

This session will cover the following questions:

- Why EMS?
- What is EMS?
- Where's the value from EMS?
- How is EMS adopted by an organization?

Presenter:

Dr. Douglas B. Johnson, PH.D., is President of Environmental Intelligence, Inc., a Minnesota based corporation that specializes in management systems consulting and the development of tools to support ISO 14001 environmental management systems. Prior to forming Environmental Intelligence, Inc., Dr. Johnson was a Senior Research Associate specializing in commercialization of environmental technologies for the Alameda Centre for Environmental Technologies, a small business incubator. While serving in his capacities in Alameda, Dr. Johnson held a joint appointment at California State University at Hayward, where he taught Strategic Environmental Management and Management of Technology and Innovation.

Registration Form (Please send a separate form for each registrant – make as many copies as you need.)

(Please fax to (204) 949-4990 or register online at www.qnet.mb.ca)
